

DANCE FLOOR GUIDE

To Determine Dance Floor Size:

- 1) Determine number of guests
- 2) Estimate one third to one half of the total guests will dance at any given time
- 3) This amount of people will determine the size of the dance floor needed.

Example:

100 people attending the event
35-50 people will dance at one time

Dance Floor – 4' x 4'

Below are a few samples:

32 dancers – 12' x 12' – 9 pieces
60 dancers – 16' x 16' – 16 pieces
128 dancers – 20' x 20' – 25 pieces

Number of pieces for 4 x 4 Sections of Dance Floor
